

Hostert LLC 90 Compact

Paper processor
with roller transport system

Perfect paper processing - A benefit for your photolab

Since nearly 6 decades the HOSTERT name stands for uncompromising quality in the design and manufacturing of photo processors for the professional photolab. When it comes to photo processors, HOSTERT PRO is a byword for reliability, durability and quality of the photographic results.

In the digital age, HOSTERT PRO meets the new challenge. With the design of the LLC 90 Compact, HOSTERT PRO now presents a new generation of compact, efficient, but still reasonably priced paper processors of 60 and 90 cm (24 and 36") working width, taking into account the requirements

of digital expose. The machines are well suited for cut sheets and rolls. RC paper, Duratrans, „day-and-night“ material can be processed without any streaks while assuring a high maximum density.

As usual with HOSTERT, all tank racks are of modular design and easy to maintain, to lift the tank racks no hoist is required.

The compact and powerful dryer allows a transport speed up to 240 cm/min (95"/min)

The LLC 90 Compact features:

- Working width 60 or 90 cm (24" or 36")
- Transport speed 67 cm or 240 cm/min
- Compact dimensions
- Maintenance friendly modular tank rack
- No hoist for tank rack required
- Suited for all RC papers and print films
- Even agitation, even with digital exposures
- Short drying time through quartz heaters of the newest generation
- For cut sheets of 5 x 5" of larger and long rolls
- Precise IR scanner for accurate replenishment
- Dosing of replenisher individually adjustable for each bath
- Accurate temperature control with heating and cooling
- All chemical baths with recirculation and temperature control
- Chemical overflows can be collected separately or in common
- PLC compact control
- Optional automatic rewind for wide rolls
- Optional daylight loading device
- Optional version with super stabilizer without wash
